Introduction

astery of geography skills helps students understand the content of geography; understanding the content of geography helps students learn about the world in which they live and the people who share it. In short, an emphasis on geography lays a solid foundation on which students can build an appreciation of social studies in their own lives.

Geography Brainstretchers provides you with the tools you need to focus on specific geographic skills while offering your students many opportunities to engage in the critical thinking that develops and refines content and concepts. The book adds both strength and structure to the teaching of geography through a problem-solving emphasis.

Geography Brainstretchers challenges your students with critical-thinking activities in each of the three basic geographical areas: U. S. geography, map and globe skills, and world geography. Designed for students in grades four through six, it includes varied exercises and problems to extend and

enrich your geography curriculum. These “brainstretchers” challenge students to use their geographical knowledge throughout the entire year.

All of these activities are designed as reinforcing activities. While they are not intended for the initial learning of geography information, the activities make an appropriate follow-up to the skills you traditionally teach through your social studies or geography program. Plan to assign these brainstretchers after you have presented basic concepts to your students. Then students will be able to strengthen those skills by using their newfound knowledge in realistic, practical, and instructionally sound activities. All of these activities can be used to reinforce important ideas covered in your social studies program.

How the Book Is Organized

Each of the three chapters contain more than twenty reproducible, one-page activity sheets organized into the following categories: Which Doesn't Belong?,

Sequences, Analogies, What's Right?, Groups and Categories, Something's Wrong Here, and Your Order Please.

These categories are not organized according to difficulty; thus you can use them in any order you wish, according to your preferences, your students' preferences, or the design of your geography program. These activities complement any or all portions of your geography curriculum by encouraging students to process information and data in a variety of ways. Allow students to select activities in keeping with their interests and abilities as well. Throughout, be sure to encourage students to use a multitude of problem-solving skills in making inferences, drawing conclusions, and seeking solution patterns. Initially, students may wish to work in pairs or small groups to share ideas and develop appropriate problem-solving techniques. Later, you may want to have pupils complete the sheets individually. Here are the activity categories presented throughout the book:

1. Which Doesn't Belong?

Here students determine a unifying geographical relationship between three of four listed items. They then identify the one word that does not share the feature or features characteristic of the other three.

Example:

Flagstaff	Phoenix
Tucson	Santa Fe

2. Sequences.

Students study a series of three words to determine the type of sequence in which they are ordered: by area, population, location, and so on. Then they write one additional word on the appropriate blank to complete the sequence. Note that there may be several ways to complete a sequence.

Example:

Manitoba Alberta _____
Saskatchewan _____ Ontario

3. Analogies.

First, students must determine how two given words or concepts are related. Then, working with a third word or concept, they create another pair related to each other in the same way.

Example:

45° : northwest :: 90° : west

4. What's Right?

After reading four statements, students must decide which of the four statements is the only correct one.

Example:

Sydney is in Australia.

Lisbon is in Spain.

Istanbul is in Greece.

Vienna is in Switzerland.

5. Groups and Categories.

A group of four words or concepts sharing a common geographical characteristic is categorized under a nonsense term. A second group does not share the characteristic. From a third group, students select the one word or concept that could be included with those in the first group.

Example:

These are CLAMORS:

Manchester	Liverpool
Bristol	Leeds

These are not CLAMORS:

Belfast	Edinburgh
Dublin	Glasgow

Which of these is a CLAMOR?

Limerick	Brighton
Londonderry	Dundee

6. Something's Wrong Here.

Students read statements that include incorrect facts. They must identify and correct the error in each statement. Note that there may be several solutions in each case.

Example:

The Yellow Sea, located between Korea and Japan, has many rivers flowing into it, which gives it its color and its name.

7. Your Order Please.

Each group of statements or words in this section is out of hierarchical order. Each also includes an unrelated concept as a distraction. Students must identify the correct sequence of the four related items by numbering (1, 2, 3, 4) each statement. In addition, students must identify the single unrelated item.

Example:

4 The island cooled and was populated by living organisms.

2 A volcano spewed lava into the surrounding area.

3 A cone broke through the ocean surface.

 Aftershocks caused tremendous tidal activity.

1 Fissures opened in the ocean floor.

An answer key with suggested responses for each activity is located at the end of the book. As students develop and refine their problem-solving abilities, they may suggest plausible answers not indicated in the key. Be sure to plan some time for students to

share the rationale behind any new answers they suggest. You may need to consult additional sources, such as geography texts, encyclopedias, the Internet, and geography professionals (high school teachers, cartographers, and so on) before you record any additional answers. Above all, keep an open mind to all possible answers, whether indicated in the key or not. Helping students understand that the study of geography allows for several explanations or definitions will be an important by-product of these activities.

All of the activities in this book are designed to foster critical-thinking skills throughout your entire geography program. In turn, students will begin to appreciate geography, not as a static subject, but as an engaging process of discovery and design. As students become more familiar with the

activities in this book, encourage them to create their own activity sheets for each of the seven groups. Then, include these student-designed sheets in a class notebook for duplication and use throughout the year. Providing youngsters with varied opportunities to create and use curricular materials based on their interests can be a powerful adjunct to your geography program.

Scope and Sequence

The following three charts outline the critical skills of geography in the content areas of U. S. geography, world geography, and map and globe skills, and the pages on which those skills are presented.

Table 1

Content: U. S. Geography

Skills	Pages
Capitals	8, 15, 16, 25, 26, 27
Cities	8, 9, 15, 17, 18, 22, 24, 25, 28
States	9, 11, 12, 13, 14, 16, 28
Bodies of Water	10, 12, 15, 17, 18, 21, 22, 23, 26, 27, 28, 30
Mountains	10, 17, 18, 25, 29, 30
Islands	12, 25, 26, 29
Nicknames	15, 20, 26
Admission of State	16, 30

What's Right?

Each sentence below makes a geographical statement. In each group of four, only one is correct. Circle the correct statement.

Colorado has more people than Georgia.
Michigan has fewer people than Minnesota.
Washington has more people than West Virginia.
Oklahoma has fewer people than North Dakota.

Pittsburgh is the largest city in Pennsylvania.
New Orleans is the largest city in Louisiana.
Kansas City is the largest city in Missouri.
Cincinnati is the largest city in Ohio.

Hawaii is farther south than Florida.
Iowa is farther east than Arkansas.
Kentucky is farther north than Kansas.
Nebraska is farther west than Texas.

Name _____

Date _____

What's Right?

Each sentence below makes a geographical statement. In each group of four, only one is correct. Circle the correct statement.

Mississippi is larger than Maine.
New Hampshire is smaller than New Jersey.
Utah is larger than Oregon.
Nevada is smaller than Wisconsin.

The Catskills are in the Peace Garden State.
Death Valley is in the Golden State.
Carlsbad Caverns is in the Badger State.
Rocky Mountain National Park is in the Mountain State.

New Mexico borders the state with the largest population.
Alaska borders two foreign countries.
Wisconsin borders two of the Great Lakes.
Tennessee borders the world's longest river.

Name _____

Date _____

What's Right?

Each sentence below makes a geographical statement. In each group of four, only one is correct. Circle the correct statement.

Four states border California.
Eight states border Missouri.
Three states border North Carolina.
Four states border West Virginia.

El Paso is located in west Texas.
Laredo is located in east Texas.
Houston is located in north Texas.
Abilene is located in south Texas.

The Colorado River is longer than
the Mississippi River.
The Snake River is shorter than
the Rio Grande.
The Ohio River is longer than the
Missouri River.
The Platte River is shorter than
the Hudson River.

Something's Wrong Here

The following statements about geography are incorrect. Decide what is wrong and rewrite each sentence. Note that there may be several ways to correct the error.

1. Carson City, Nevada, is further east than San Diego, California.
2. Oahu is the largest island in the state of Hawaii.
3. The Boston Mountains are located in Massachusetts.
4. The capital of the Equality State is south of the capital of the Centennial State.
5. Alaska is the state with the fewest number of people.

Something's Wrong Here

The following statements about geography are incorrect. Decide what is wrong and rewrite each sentence. Note that there may be several ways to correct the error.

1. The nation's capital is east of the nation's largest city.
2. The Beehive State gets the fewest number of tourists annually.
3. The Rio Grande begins in New Mexico.
4. The Barrier Islands are located off the coast of Florida.
5. Five states border Oklahoma.

Name _____

Date _____

Something's Wrong Here

The following statements about geography are incorrect. Decide what is wrong and rewrite each sentence. Note that there may be several ways to correct the error.

1. The highest and lowest points in the continental United States are located in Colorado.
2. Hawaii is the only state that is divided into more than one part by a body of water.
3. Albany is the capital of the state with the most people.
4. Oklahoma and Nebraska are the two states with "panhandles."
5. The only place in the United States where four states meet in one spot is located in the Southeast.

Your Order Please

Four of the five geographical terms or sentences in each set below are not in the correct order. A fifth does not belong with the other four. Write the numbers 1, 2, 3, or 4 before each to indicate the right order. Leave the unrelated sentence or word blank.

1.

- _____ It flows past St. Louis.
- _____ It flows across Illinois.
- _____ It meets with the Ohio River.
- _____ It is part of the border of Minnesota.
- _____ It is part of the border of Louisiana.

2.

From largest to smallest:

- _____ Texas
- _____ Montana
- _____ Alaska
- _____ Georgia
- _____ California

3.

From south to north:

- _____ Des Moines
- _____ Raleigh
- _____ Tallahassee
- _____ Columbia
- _____ Atlanta

Name _____

Date _____

Your Order Please

Four of the five geographical terms or sentences in each set below are not in the correct order. A fifth does not belong with the other four. Write the numbers 1, 2, 3, or 4 before each to indicate the right order. Leave the unrelated sentence or word blank.

1.

- _____ The island cooled and was populated by living organisms.
- _____ A volcano spewed lava into the surrounding area.
- _____ A cone broke through the ocean surface.
- _____ Aftershocks caused tremendous tidal activity.
- _____ A fissure opened in the ocean floor.

2.

- _____ Drive through the Pelican State.
- _____ Drive through the capital of the Cornhusker State.
- _____ Travel through the Golden State heading east.
- _____ Continue to Omaha.
- _____ Go through the state with the largest non-freshwater lake.

3.

- Beginning with the tallest:
- _____ Grand Teton Mountain
 - _____ Mt. McKinley
 - _____ Mt. Whitney
 - _____ Mt. Elbert
 - _____ Mountain View

Your Order Please

Four of the five geographical terms or sentences in each set below are not in the correct order. A fifth does not belong with the other four. Write the numbers 1, 2, 3, or 4 before each to indicate the right order. Leave the unrelated sentence or word blank.

1.

- _____ Layers of dead plants and animals built up over the years.
- _____ Coal was formed in the Appalachian Mountain region.
- _____ Long ago, great swamps covered the earth.
- _____ Sediment built up and pressed down on the decaying materials.
- _____ The Ohio River flowed into the Colorado River.

2.

From earliest to latest:

- _____ Georgia became a state.
- _____ Seattle became a state.
- _____ Arizona became a state.
- _____ Wyoming became a state.
- _____ Alabama became a state.

3.

- _____ It empties into the Gulf of California.
- _____ Its source is in Colorado.
- _____ It forms part of the border between Nevada and Arizona.
- _____ It flows past the Glen Canyon Dam.
- _____ It flows near Santa Fe.

What's Right?

Each sentence below makes a geographical statement. In each group of four, only one is correct. Circle the correct statement.

If 1" = 2½ mi, then 11½" = 28¾ mi.

If 1" = 4 mi, then 3½" = 11 mi.

If 1" = 5½ mi, then 7" = 36½ mi.

If 1" = 3¼ mi, then 5" = 15¼ mi.

Pittsburgh and San Francisco are farther apart than New York and Los Angeles.

San Antonio and San Diego are farther apart than Washington, D. C., and Albuquerque.

Miami and Denver are farther apart than Phoenix and Louisville, Kentucky.

Seattle and Chicago are farther apart than Portland, Oregon, and Boston.

Kentucky has no straight borders.

Montana has two time zones.

Hawaii has interstate highways.

Maine has a border with two foreign countries.

Name _____

Date _____

What's Right?

Each sentence below makes a geographical statement. In each group of four, only one is correct. Circle the correct statement.

India is east of Saudi Arabia.
French Guyana is south of Paraguay.
Turkey is west of Portugal.
Indonesia is north of Korea.

one mile = 1,760 yards
one mile = 22,240 inches
one mile = 1.7 kilometers
one mile = 390 meters

Mongolia is north of 30° N.
Yemen is south of 10° N.
Scotland is south of 50° N.
Italy is north of 60° N.

Name _____

Date _____

Groups and Categories

The word groups below contain three sets of terms related to geography. Decide what members of the first set share. Compare them to the second set. Finally, circle the word or concept in the last set that fits into the first. Each group has been given a nonsense name.

These are NATRIGS:

Arctic Circle	International	tropic of	equator
	Date Line	Cancer	

These are not NATRIGS:

line	time zone	latitude	boundary
------	-----------	----------	----------

Which of these is a NATRIG?

longitude	Prime	parallel	South Pole
	Meridian		

These are BUGDUGS:

gulf	channel	bay	harbor
------	---------	-----	--------

These are not BUGDUGS:

plateau	range	canyon	hill
---------	-------	--------	------

Which of these is a BUGDUG?

cliff	valley	highland	sound
-------	--------	----------	-------

Name _____

Something's Wrong Here

The following statements about geography are incorrect. Decide what is wrong and rewrite each sentence. Note that there may be several ways to correct the error.

1. A globe is a model of the earth. It can be used to show how the earth vibrates.
2. The distance from the North Pole to the South Pole is 120° .
3. Everything west of the equator is located in the Northern Hemisphere.
4. A gulf is usually smaller than a bay.
5. An international boundary is a border between two counties.

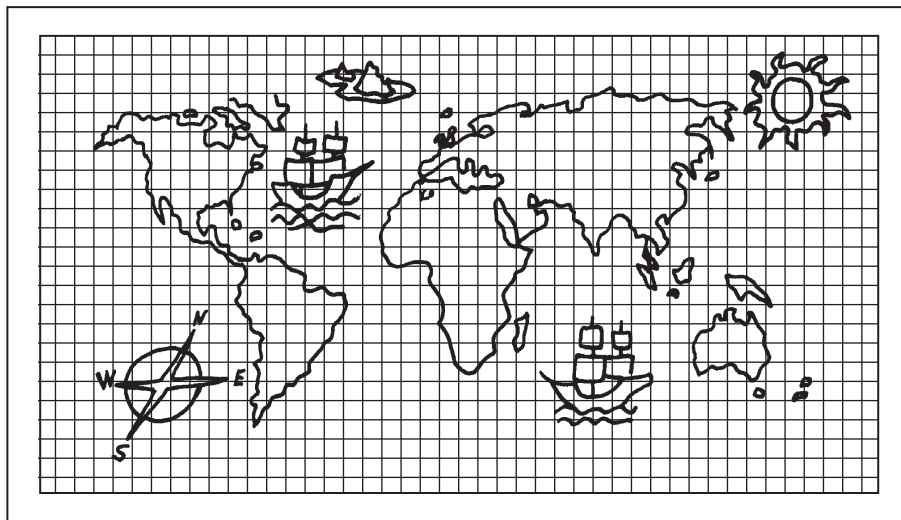

Name _____

Date _____

Something's Wrong Here

The following statements about geography are incorrect. Decide what is wrong and rewrite each sentence. Note that there may be several ways to correct the error.

1. A scale model is an exact copy of a real object only larger.
2. If 1 inch equals 7.2 kilometers, then $3\frac{1}{2}$ inches equals 24.7 kilometers.
3. Bar scales are tools that help us find highways between points on a map.
4. The United States is divided into four time zones.
5. On a map, the symbol for an international boundary will be lighter than the symbol for a state boundary.

Something's Wrong Here

The following statements about geography are incorrect. Decide what is wrong and rewrite each sentence. Note that there may be several ways to correct the error.

1. A political map indicates different types of landforms such as mountains, plains, and valleys.
2. A peninsula is a sheltered area of water where ships can anchor.
3. On June 21 the South Pole is tilted toward the sun and the sun's rays strike most directly north of the equator.
4. The equator is one of the imaginary east-west lines around the world known as meridians.
5. A sound is a waterway dug across land through which ships can pass.

Your Order Please

Four of the five geographical terms or sentences in each set below are not in the correct order. A fifth does not belong with the other four. Write the numbers 1, 2, 3, or 4 before each to indicate the right order. Leave the unrelated sentence or word blank.

1.

- _____ Cool air masses meet with clouds.
- _____ Warm air masses settle in low-lying areas.
- _____ Water is changed into water vapor.
- _____ Condensation occurs over large bodies of water.
- _____ Clouds form over land surfaces.

2.

To get from London to Edinburgh:

- _____ drive past Manchester
- _____ drive past Cardiff
- _____ drive past Nottingham
- _____ drive past Leeds
- _____ drive past Middlesbrough

3.

From north to south:

- _____ Brazil
- _____ Argentina
- _____ Bolivia
- _____ Venezuela
- _____ Gabon

Name _____

Date _____

Your Order Please

Four of the five geographical terms or sentences in each set below are not in the correct order. A fifth does not belong with the other four. Write the numbers 1, 2, 3, or 4 before each to indicate the right order. Leave the unrelated sentence or word blank.

1.

Largest to smallest:

- _____ province
- _____ municipality
- _____ neighborhood
- _____ township
- _____ place

2.

West to east along
the 40° parallel are

- _____ Spain
- _____ Italy
- _____ Greece
- _____ Syria
- _____ Albania

3.

- _____ Approximately six hours later, low tide occurs.
- _____ Large amounts of water build up under the ice caps.
- _____ Water moves to the part of the earth closest to the moon.
- _____ Water level rises along the coast.
- _____ The moon exerts a gravitational pull.

Your Order Please

Four of the five geographical terms or sentences in each set below are not in the correct order. A fifth does not belong with the other four. Write the numbers 1, 2, 3, or 4 before each to indicate the right order. Leave the unrelated sentence or word blank.

1.

East to west along the 15° parallel are

- _____ Malaysia
- _____ Philippines
- _____ Laos
- _____ Thailand
- _____ Vietnam

2.

Largest to smallest:

- _____ hemisphere
- _____ continent
- _____ country
- _____ area
- _____ globe

3.

From the North Pole
the Prime Meridian
passes through

- _____ Pyrenees
- _____ London
- _____ France
- _____ Paris
- _____ North Sea

What's Right?

Each sentence below makes a geographical statement. In each group of four, only one is correct. Circle the correct statement.

Egypt and Ethiopia border Sudan.
Somalia and Zambia border Kenya.
Zimbabwe and South Africa border Zambia.
Niger and Algeria border Nigeria.

Australia covers 3,966 square miles.
Canada covers 3,850 square miles.
India covers 2,237 square miles.
China covers 4,719 square miles.

The Caribbean Sea is south of Ecuador.
The Arabian Sea is south of Tanzania.
The Bering Sea is south of the Philippines.
The Mediterranean Sea is south of Austria.

Name _____

Date _____

What's Right?

Each sentence below makes a geographical statement. In each group of four, only one is correct. Circle the correct statement.

The Andes are in Uruguay.
The Rockies are in Canada.
The Alps are in Denmark.
The Himalayas are in Vietnam.

Columbia and Chad are in the Western Hemisphere.
Australia and Argentina are in the Southern Hemisphere.
Bolivia and Bulgaria are in the Eastern Hemisphere.
Mongolia and Malaysia are in the Northern Hemisphere.

North America is a country.
Greenland is a continent.
Asia is a country.
Australia is a continent.

Something's Wrong Here

The following statements about geography are incorrect. Decide what is wrong and rewrite each sentence. Note that there may be several ways to correct the error.

1. North America is the largest continent in the world.
2. Calcutta is NE of Bombay and SW of New Delhi.
3. Spain is bordered by Portugal, Italy, and France.
4. Chile and Argentina are the two longest countries in South America.
5. Mexico is bordered by two foreign countries.

Something's Wrong Here

The following statements about geography are incorrect. Decide what is wrong and rewrite each sentence. Note that there may be several ways to correct the error.

1. Quebec is the largest Canadian province.
2. The Sahara and the Mojave are the world's two largest deserts.
3. Only two continents are completely surrounded by water.
4. The Iberian Peninsula is the coldest peninsula in the world.
5. India is the country with the most rain forests.

Your Order Please

Four of the five geographical terms or sentences in each set below are not in the correct order. A fifth does not belong with the other four. Write the numbers 1, 2, 3, or 4 before each to indicate the right order. Leave the unrelated sentence or word blank.

1.

West to east along latitude 30° S are

- _____ Argentina
- _____ Bolivia
- _____ Brazil
- _____ Chile
- _____ South Africa

2.

- _____ The Gulf Stream sweeps by Florida.
- _____ The Gulf Stream sweeps by England.
- _____ The Gulf Stream sweeps by Cuba.
- _____ The Gulf Stream sweeps by Spain.
- _____ The Gulf Stream sweeps by Iceland.

3.

- _____ Water soaks into the ground and runs off into water sources.
- _____ Vapor rises and cools into liquid.
- _____ Water falls to Earth in the form of precipitation.
- _____ Water evaporates from the surface of ponds, lakes, and oceans.
- _____ Fog forms over streams and rivers.

Your Order Please
